ABHA TIWARI

B.Tech Computer Science & Engineering | Aspiring AI/ML & Cybersecurity

Bilaspur, Chhattisgarh, India abha69528@gmail.com GitHub LinkedIn Portfolio Codeforces TryHackMe

EDUCATION

B.Tech Computer Science & Engineering
Government Engineering College, Bilaspur
2025 - 2029 | 3rd Semester
1st Semester SPI: 8.5/10
CGPET 2025 State Rank: 229
JEE Main 2025: 86.66 Percentile

TECHNICAL SKILLS

Programming: Python, C++, C, JavaScript, HTML, CSS
DSA: Basic Data Structures & Algorithms in Python and C++
AI / ML: AI fundamentals, Machine Learning fundamentals, LLM concepts, AI-agent concepts
Cybersecurity & Networking: Linux, networking fundamentals, TCP/IP, DNS, HTTP/HTTPS, basic web security
Data: SQL fundamentals, data analysis fundamentals
Tools: Git, GitHub, VS Code, Streamlit

CERTIFICATIONS

- Cybersecurity Certificate - Lenovo | 2026
- IBM SkillsBuild Virtual Internship - AI Automation & Intelligent Solutions | 2026
- Linux CLI Basics - Cybrary
- Network Basics – Cybrary

CODING & LEARNING

- Problem-solving practice in C++ on Codeforces, Python on HackerRank, and beginner-level practice on LeetCode.
- Approximately 20 Codeforces problems solved in C++ and 20-30 easy HackerRank problems in Python.
- Building foundations in computer networking, cybersecurity, data analysis and AI/ML through self-learning and projects.

ACTIVITIES

- Hands-on cybersecurity practice through TryHackMe.
- GitHub-based project development and deployment.
- Anti-Ragging Representative, Government Engineering College, Bilaspur.

PROFILE

Computer Science undergraduate with hands-on experience building and deploying practical software projects. Strong foundation in Python, C++, basic Data Structures & Algorithms and core computer science concepts, with developing skills in AI/ML, cybersecurity, computer networking and data analysis. Interested in building a career in AI/ML and cybersecurity.

INTERNSHIP

IBM SkillsBuild Virtual Internship - AI Automation & Intelligent Solutions | **2026**

- Completed a virtual internship focused on AI automation and intelligent-solution concepts.
- Gained practical exposure to applying AI concepts to problem-solving scenarios.

PROJECTS

CropWise - Smart Market Linkage & Price Discovery Platform

GitHub

- Built and deployed a practical agricultural market platform for comparing markets and supporting decision-making.
- Implemented market comparison, net-profit analysis and farmer-buyer matching features.
- Worked with React, FastAPI and PostgreSQL/Supabase as part of the application stack.

PortSight - Network Security Exposure Assessment Platform

GitHub

- Built a web-based cybersecurity project for assessing exposed services on authorized/demo targets.
- Worked on service identification, risk classification and security recommendations.
- Implemented authentication, scan-history and reporting features during development.

AI-Powered SOC Assistant / Security Log Analyzer

GitHub

- Built a prototype for analyzing security logs and supporting basic SOC-style workflows.
- Explored threat classification, incident-response recommendations and automated report generation.
- Developed the prototype using Python and Streamlit while learning AI-agent concepts.

CSVTU Buddy

- Developed a student-focused academic project while strengthening practical programming and application-development skills.

FOCUS

AI/ML | Data Analysis | Cybersecurity | Computer Networking | Software Development
